

REALITY

Is reality actual, by definition factual?

If reality is actual and actuality is real
To what does the actuality of love appeal?

To be subjective yet real and actual as well
comprises a truth our Bible must tell.

To be or not to be , is Aristotle's demand
not met by Nature's design so grand.

What wots* it, God must have said
when He decreed that that this can be that, instead.

Mankind will learn to deal with his duality
for actuality is real in man's totality!
